		JP 11-015573	1/22/1999	Sakamoto Naomasa	Abstract			
		JP 05-127785	05/25/1993	Obara Keiji	Abstract			

The JP 11-015573 reference is relevant to the present invention as JP 11-015573 teaches

selectively turning ON and OFF the power to elements of information equipment such as a notebook

computer to manage power consumption. The present invention selectively disables communication

adapters for a notebook or laptop computer.

The JP 05-127785 reference is also relevant to the present invention by teaching selectively

managing the power of devices under power management. Inputs from timers, a counter, and a

temperature sensor are used to control power controllers and a frequency controller that manage the

power supplied to devices. The present invention selectively disables communication adapters for a

notebook or laptop computer.

Respectfully submitted,
